Rethinking the ethics of AI: Towards a Franco-Japanese dialogue Educational and cultural perspectives

November 9, 2023 (10AM-5.30PM)

Today, it is clear that it is no longer possible to develop AI without paying attention to social, ethical and political issues. To achieve this, it is particularly important to set up a multicultural dialogue to build harmonious approaches that respect pluralisms (political, cultural, etc.).

To this end, we propose to bring together experts from France and Japan to open up new avenues from different horizons and different voices.
